**ORDER**

**Sub: Restoration /conversion of connections from Non-Domestic service to domestic service where connections were originally released under domestic category and subsequently converted to Non-Domestic category and vice versa.**

Representations have been received from various consumers representing that their electric connections are not being allowed to be converted to domestic category even though the connections were originally released under domestic category and were subsequently converted to Non-Domestic category on grounds of use of the premises for non-domestic purposes either by the erstwhile Board/Successor Companies or at the request of the consumer himself. In such cases the use of the premises for non-domestic purposes has been ceased and the premises are being again used for bonafide domestic purposes only. Presently, such restoration/conversion is not being allowed by the field officers as change of category from "Higher Tariff" to "Lower Tariff" is not permissible under the existing rules.

The matter was considered by the Co-ordination Committee in its 51<sup>st</sup> meeting held on 6.1.03 wherein it has been decided that the restoration/conversion of such connection from non-domestic category to domestic category can be allowed provided the original connection was released under domestic category i.e Tariff Schedule DS/LT-1. However, before allowing such restoration/ conversion, the concerned field officer should verify and certify that the premises in question is being used for bonafide domestic purposes only.

Restoration/conversion should be allowed and made effective from the date on which the consumer has applied for conversion to Domestic category with the concerned field officer.

Field officers are, therefore, advised to take action accordingly.
