S.No	ITEM	QUANTITY (in Nos.)
1.	BATTERY CHARGERS SUITABLE FOR 110V-120 AH CAPACITY BATTERY SETS	50

NOTE:-The quantities as mentioned in the schedule of requirements are tentative and may increase/decrease as per the requirement of the Nigam.

SCHEDULE- II**PRICE ADJUSTMENT FORMULA****PRICE VARIATION CLAUSE FOR BATTERY CHARGER EQUIPMENT**

The price quoted/confirmed is based on the input cost of raw material and labour cost as on the date of quotation and the same is deemed to be related to the index number for Battery Charger Equipment and all India average consumer price index number for industrial workers as specified in the price variation clause given below. In case of any variation in these index numbers, the price payable shall be subject to adjustment up or down in accordance with the following formula:

$$P = P_o/100 \{20 + 50 (IN-BTR-CHRG/ INo-BTR-CHRG) + 30 (W/W_o)\}$$

Wherein,

P = Price payable as adjusted in accordance with the above formula.

P_o = Price quoted/confirmed.

INo-BTR-CHRG=Index number for battery charger equipment based on relative prices and weightages (as given in brackets) of C.C. copper rods (30), electrical steel laminations (10) and wholesale price index of 'Iron and Steel' (10), calculated considering their values as on 1st June 2000 as base equal to 100 (refer notes).

This index number is as applicable on the first working day of the month, one month prior to the date of tendering.

W_o = All India average consumer price index number for industrial workers, as published by the Labour Bureau, Ministry of Labour, Govt. of India (Base 2001 = 100).

This index number is as applicable for the month, four months prior to the date of tendering.

For example, if the date of tendering falls in May 2001 the applicable index number for battery charger equipment (INo-BTR-CHRG) should be that prevailing as on '1st April' 2001 and the applicable all India average consumer price index number (W_o) should be for the month of January 2001.

The above indices are as published by IEEMA vide IEEMA circular reference number IEEMA(PVC)/BTR/_/- prevailing as on first working day of the month i.e., one month prior to the date of tendering.

IN - BTR CHRG =

Index number for battery charger equipment based on relative prices and weightages (as given in the brackets) C.C. copper rods (30) electrical steel laminations (10) and wholesale price index of 'Iron and Steel' (10), Calculated considering their values as on 1st June 2000 as base equal to 100 (refer notes).

This index number is as applicable on the first working day of the month, one month prior to the date of delivery.

W = All India average consumer price index number for industrial workers (base 1982 = 100) as published by Labour Bureau, Ministry of Labour, Govt. of India.

This index number is as applicable for the month, four months prior to the date of delivery.

For example, if the date of delivery in terms of clause given below falls in December 2001, the applicable index number for battery charger equipment (IN-BTR-CHRG) should be that as published by IEEMA as prevailing on 1st November 2001 and the applicable all India average consumer price index number (W) should be for the month of August 2001.

The "date of delivery" is the date on which the battery charger equipment is notified as being ready for inspection/despatch (in the absence of such notification, the date of manufacturer's despatch note is to be considered as the date of delivery) or the contracted delivery date (including any agreed extension thereto), whichever is earlier.

Notes: (a) All prices of raw materials considered for arriving at the index number for battery charger equipment are exclusive of modvatable excise duty and exclusive of any other central, state or local taxes, octroi etc.

(b) All prices are as on 1st working day of the calendar month.

(c) The details of the prices considered for index number for battery charger equipments are as under:

- 1) The price of C.C. copper rod (in Rs/MT) is the ex-works price of a primary producer of copper.
- 2) The price of laminations (in Rs/kg) is the average of the ex-works price as quoted by the two manufacturers for CRGO plain strip transformer lamination with an area between 301 and 1000 sq. cm produced from M4 Grade (41) steel, fully processed and stress relief annealed.
- 3) The wholesale price index number for 'Iron and Steel' is as published by the office of Economic Advisor, Ministry of Industry, Govt. of India, New Delhi, with base 1993-94 = 100. This wholesale price index is being published weekly on provisional basis. However, the same gets finalized after eight weeks and is normally available after two months. Therefore, we are considering in our calculations this final index published by Economic Advisor for the first Saturday of the months two months prior to the date of which the prices of other raw materials are considered.

For example, for calculating index number for battery charger equipment on first day of the month of October, the basic prices of copper rods, electrical steel lamination are to be considered as on first working day of October and the wholesale price index number for 'Iron and Steel' is to be considered as published by Economic Advisor for the first week ending Saturday of the month of August.

Note:- The base date will be 1.12.2016 irrespective of date of tender opening.

SCHEDULE-II-A**PRICES & PRICE VARIATION**

- b) If the price variation formula is changed, the same shall be applicable for the price variation. During the transit period when both old and new indices are being circulated, then the admissible Price Variation shall be applicable, which is advantageous to Nigam, and the period from which the old indices are discontinued then the P.V. shall be admissible with the new indices.
- c) The date of delivery applicable for claiming price variation shall be the date prevailing on the first day of Calendar month which shall be determined in the manner prescribed hereunder:-
