

No.JdVVNL/MD/CE(HQ)/SE(RA&C)/JU/2017-18/D. 1297 Dt. 29.12.17

ORDER

Sub.: Regarding tariff payable to the consumers for excess energy supplied to Discom under Net Metering Regulation, 2015.

The detailed Guidelines & Procedure for Net Metering and Grid Connectivity of Grid Connected Rooftop & Small Solar Photovoltaic Systems has been issued vide Comml.JDP/682 and subsequently orders were issued on the subject matter.

The regulation provides that in the event the electricity injected by such system exceeds the electricity consumed during billing period, such excess exported energy to the grid by the consumer/generator would be payable by the Distribution Licensee at feed in tariff determined by the Commission from time to time for solar photo voltaic generation in next billing period provided that such export is above 50 units.

Earlier the feed in tariff at which payment is to be made to the consumers for excess units supplied to Discom was decided as Rs.5.40/unit vide order No.1482 dtd.11.01.17(Comml.JDP/751). Now RERC has issued order dated 09-10-2017, in the matter of "Determination of Benchmark Capital Cost for Solar PV and Solar Thermal Power Projects applicable during FY 2017-18 and resultant Generic Levelised Tariff". The rate for feed in tariff is decided in this order as **Rs.3.93/unit(if AD benefit is not availed) and Rs.3.66/unit(if AD benefit is availed)**. The tariff would be payable to all such systems set under Net Metering during FY 2017-18 and earlier and would be irrespective of grant of capital subsidy.

It is, therefore, directed that feed in tariff at which payment is to be made to the consumers for excess units supplied to Discom is Rs.3.93/unit (if AD benefit is not availed) and Rs.3.66/unit(if AD benefit is availed)w.e.f. 01.04.17 till further orders. The excess amount paid by Discom w.e.f. 01.04.17 will be adjusted in ensuing Billing cycle.

By Order,

(M. R. MEENA) 29/12/17
