

9th RAJASTHAN ENERGY CONSERVATION AWARD - 2018		
Evaluation and weightage criteria		
S. No.	ITEM	Max 50 marks
1	ENERGY SAVINGS - Electrical and Thermal	(15 Marks)
i	Electrical Energy (EE) savings in 2017-18	
	% savings in EE over the previous year (2016-17)	
ii	Thermal energy savings in 2017-18	
	% savings in Thermal Energy over the previous year (2016-17)	
2	SPECIFIC ENERGY CONSUMPTION REDUCTION	(15 Marks)
i	% reduction in electrical energy consumption during 2017-18 over 2016-17	
ii	% reduction in thermal energy consumption during 2017-18 over 2016-17	
	% SEC reduction during 2017-18 over 2016-17	
3	Specific Energy Consumption Comparisons with the best reported values among the participating units	(20 Marks)

NOTE:

1. The above evaluation and weightage criteria is common for all the participating units. However for some sectors, the application of the above criteria may not be feasible due to certain peculiar characteristics of the concerned sectors. Therefore, Award Committee reserves the right to modify the criteria for a particular sector, which shall be uniformly applied to all the participating units of that sector.
2. The distribution of weightage between specific electrical and thermal energy consumption for a particular sector would be decided by the Award Committee. In the categories where the thermal energy is not applicable then the marks weightage would be for electrical energy.
3. For those particular sector, where it is not feasible to compare SEC with best reported value, 50% of the weightage may be merged with S.No.-2 and the balance 50% with S.No.-1
4. The evaluation for special recognition awards would be based on relative weightage criteria which shall be decided by the Award Committee.
