**Sub:- Revision in "Meter Reading Record" (Ajmer Discom A-10) for recording readings of Maximum Demand.**

Presently 3 phase static (10-60 Amps.) energy meters are installed in case of 3 phase connections. These meters also display the maximum demand in KVA/KW. The meter readers of Discom are required to record this reading of Maximum Demand every month but it has been found that this reading is not being recorded for want of non-existence of suitable column in meter reading proforma A-10.

The matter has been considered & it has been decided to suitably amend the proforma A-10 so as to add one more column for recording maximum demand in KVA/KW. This reading of maximum demand however is not to be used for billing purposes and would help in keeping check on the load of the consumer.

Accordingly, the revised format of "Meter Reading Record" (A-10) is enclosed for implementing the same in case of three-phase connections. It is enjoined upon all the field officers to ensure that the revised format is used and filled up by the persons deputed for taking meter readings.

Encl. Sample of A-10 Format
