## ORDER

**Sub:- Regarding Distribution network being crossed by EHV lines above 400KV**

The large number of complaints has been received from the field that, while working over distribution network below

an existing EHV line specially above 400 KV the induction current is being faced by workmen working on lines even after proper shut down & proper earthing of line, resulting sometimes into fatal / non fatal accidents.

" The matter was discussed and has been decided that in future while erection of EHV lines (above 400KV) the crossing of 33/11 KV/LT bare conductor lines shall be replaced by underground cables. The cost for replacement shall be born by the Department / authority laying the new EHV lines, only after which the shutdown be provided for erection of these lines.

The old existing 33/11 KV/LT bare conductor lines crossed by EHV above 400KV lines can be made underground if there is problem of induction current at the cost of Nigam after taking proper approval as per DOP. The decision has been taken in view of safety of workmen working on the distribution network under EHV lines.

All concerned are directed to comply with the above directions.

By Order,

  
(N.S. Sehwal)

Addl. Chief Engineer (HQ)  
AVVNL Ajmer
