Jaipur, Dated 18/5/17

CIRCULAR

Subject: Guidelines regarding charging/commissioning of a new EHV GSS.

It has been observed that newly constructed Grid Sub Stations are declared commissioned only by charging the EHV Transformer either from HV or LV side. Operational staff is also being posted at such GSSs without commercial operation of GSS. Such idling of Staff and Resources have been viewed seriously by the management. To avoid such situation in future, it is enjoined upon all the concerned to ensure the following:

1. A newly constructed GSS is to be declared commissioned only when it is ready for commercial operation/use (partially or fully).
2. A newly constructed GSS be considered for partial/full commercial use only if all the construction works (viz. civil/electrical/mechanical/communication etc.) pertaining to that part of the GSS which will be used for its commercial operation are completed in all respects and all the pre-commissioning formalities like installation of RTU, permission by Electrical Inspector etc. are completed.
3. A "Pre-Commissioning Inspection Committee" of RVPN officers will visit the newly constructed EHV GSS and its associated line/sites to decide & report if the GSS and/or line are technically ready for commissioning.
4. In no case, staff is to be posted at newly commissioned GSS where commercial operation has not started or not likely to be expected within a week.
5. Operation & Maintenance of a GSS is not to be outsourced unless it is commercially operational or ready for start of commercial operation subsequent to its commissioning.

By Order,

(N.K. Gupta)

Superintending Engineer (QC, Insp. & Montg.)
