NO.JPD/CAO (RR&B)/F. 724 (iv) /D 1227

Jaipur, dated: 17.02.2020

ORDER**Sub:-Regarding Capturing of Geo Location .**

Energy bills are issued to consumers on spot basis under TN-64 RMS. The very essence of spot billing is that the feeder incharge generates and serves the energy bill to the consumer on the basis of reading recorded at consumer's premises. However, it has been observed that at present the Feeder Incharge changes the consumer location at his own will and bills the energy consumed by the consumer without visiting the premises. Hence, the consumers are not being billed correctly with their actual reading. On one hand, this defeats the very purpose of spot billing and on the other hand leads to a revenue loss to the Nigam. Therefore, following detailed directions hereby issued for strict compliance by the field officers/ officials and the billing agency:-

1. All the Feeder Incharge shall mandatorily record the longitude and latitude location of all the concerned consumers during the month of February and March 2020.
2. The location recorded and saved by the Feeder Incharges during billing month of March, 2020 shall not be subject to any modification subsequently.
3. The onsite bill will be generated in the geo fencing range of $\pm 100m$ at Meter Location Tagging from the billing month of April 2020.

This bears the approval of the Managing Director.

(K.C. Gupta)

Chief Accounts Officer (RR&B)
