**Sub: Regarding release of Ag. connections.**

While going through the daily progress of Ag. connections during F.Y.2020-21 it is observed that progress of release of Ag. Connections is very slow and till now only 9697 Nos. Ag. Connections is released during this financial year upto 2.3.2021 and 24277 Nos. connections whose demand notices have already been deposited, are lying pending. It has also gathered by reviewing the material requirement position, that sufficient material required for release of Ag. Connections is available but in spite of that progress is not upto the mark. This reflects lack of monitoring at the level of circle /zone level and needs their explanation.

Procedure for release of Ag. Connections is well defined in Ag. Policy 2017 and its subsequent amendment the release of connections is also allowed on ARC 2019 as per norms and rules prescribed therein.

You are, therefore, directed to expedite the balance ag. Connections immediately. The ACE(PPM) shall compile daily progress from all the circle through SE(RE) and coordinate for material requirement with CE(MM) and TA to MD, JVVNL.
