

No. JPD/MD/TA / F. /D. 118

Jaipur, date: 09-03-21

**ORDER****Sub:-Regarding consumer indexing in respect of feeder and distribution transformers.**

Repeated directions are being issued to ensure 100% consumer indexing with respect to 33/11KV S/S, 11KV feeders and their respective distribution transformers for proper feeder level and distribution transformer level energy auditing. This is also a mandatory requirement as per Rajasthan State Electricity Distribution Management Responsibility Act-2016 as well as of MOP, Government of India and also as per direction of the Rajasthan Electricity Regulatory Commission. In spite of above provision and repeated directions work of completion of consumer indexing either incomplete or incorrect and not being regularly updated while releasing new connection or any change in the distribution system due to feeder separation or as and when consumer shifted from one DT to other DT or on another 11KV feeder due to system requirement. Vide this office order No.91 dt.23.2.2021 it was advised to ensure it by 31.03.2021.

The work of installation of DT metering in municipal towns has already been started and being carried out under TN-62 by M/s. Secure Meters. It is, therefore, directed that where the work of installation of DT metering have been started or DTs which are covered in municipal town under TN-62 respective consumers of that DTs be mapped with corresponding DTs so that the transformer level energy audit be started immediately. Energy audit at DT level and 11KV feeder level is mandatory to publish on National Portal, GoI upto 1.4.2021.

It is, therefore, once again directed to expedite this work so that high loss feeder and high loss area DT may be identified timely for reduction of T&D and AT&C loss.

Matter urgent. Non compliance of above directions shall be viewed seriously and liable for disciplinary action.
