Jaipur, Dt: 21/2/14

The Managing Director,
Jaipur Discom
Jaipur.

Sub:-Huge burning rate of single phase transformers in Alwar Circle.

During my visit of Alwar circle on 12th Feb., 14, the Assistant Engineers of the circle were reporting very high rate of burning of single phase transformers ranging between 20 to 52%. In number of sub-divisions, the burning rate was more than 30%. It is a very serious state of affairs and is not only resulting in customer dissatisfaction but also resulting in huge avoidable expenditure on repair and replacement of transformers. The responsibility needs to be fixed for negligence on the part of Sr. Officers also.

It is, therefore, advised as under:

- 1. Take remedial technical & administrative measures to control the burning rate of transformers.*
- 2. For the situation prevailing in Alwar circle, the Junior field officers alone cannot be held guilty, therefore, disciplinary action needs to be initiated against the concerned SE, CE & Director (Technical).*

*Disciplinary action against the Sr. Officers will help the Discoms to ensure the involvement of Sr. Officers in the remedial process. An **Action Taken Report** may please be submitted within a month.*

(R. G. Gupta)
