### **ORDER**

**Sub: Extension of contract demand of existing industrial/ NDS Consumers**

On Perusal of actual monthly contract demand, consumption details of existing large industrial/ NDS consumers revealed that many of these consumers have been regularly causing the actual maximum demand below 75% of the demand contracted. This indicates that contract demand taken by the consumer is more than their actual demand. As a result the upgraded capacity of Transmission, Distribution & Generation infrastructure to meet the contracted demand remains unutilized. Further this will also results in either delaying or depriving the prospective consumer from timely release of connections of genuine demand for the sake of unnecessary network augmentation.

Therefore, for optimum utilization of the power network capacity and to avoid unnecessary system augmentation and timely release of new connection to prospective large industrial/ NDS consumers, henceforth the application of extension of contract demand of existing large industrial/ NDS consumers beyond 1 MVA be routed through the commercial wing of the Discom without failure for examining the actual/ true need in view of the above before final approval.

Strict compliance of above directions be ensured.

( A.K. Singh )

Superintending Engineer(Comml.)
