ORDER

Sub: Correct reading of auxiliary consumption at RRVPN's GSS.

The actual drawl of Distribution Company from RRVPN's GSS is calculated by subtracting the auxiliary consumption recorded by the meters installed at RRVPN's GSS. It is observed that the meters installed at RRVPN's GSS for recording of auxiliary consumption are not checked /tested periodically, due to which auxiliary consumption is not properly recorded and adjusted.

In order to proper recording of auxiliary consumption, it has been decided that the meter installed at RRVPN's GSS shall be got checked / tested by M&P Wing Officers periodically and monthly reading of auxiliary meters shall also invariably be taken by them for ensuring the correct adjustment of auxiliary consumption in the Energy drawl of Discom.

Strict compliance of above instructions be adhered.

By order,

(A.K. Khandelwal)
Chief Engineer (HQ)
