

ORDER**Sub. : Procedure for release of new domestic connections in rural area providing XLPE armoured PVC cable by Jaipur Discom.**

An order No. 469 dt. 19-3-07 (JPR5-387) was issued vide which it was instructed that for releasing new domestic connections in rural areas, only XLPE armoured PVC cable shall be used. The cable is to be provided by the consumer of his own. However, for this, a sum of Rs. 60/- per month is required to be reimbursed to the consumer by way of adjustment in future energy bills. The cost of the cable has been considered as Rs. 30/- per meter.

It has been reported that there is a huge pendency of domestic connections. The main reason is because of the fact that the applicants are not providing XLPE armoured PVC cable. In order to expedite the release of domestic connections in rural areas, it has been decided that since sufficient quantity of aforesaid XLPE armoured PVC cable is available in stores, therefore to release new connections in rural areas the cable be provided by the Nigam instead of asking the applicants to bring at his own. Since the cable will now be provided by the Nigam, there will be no reimbursement required by way of adjustment in future energy bills.

These instructions are issued in partial modification of the Order No. 469 dt. 19-3-07 (JPR5-387) to the above extent.
