ORDER

Sub: Extension of line beyond RIICO Industrial Area for release of connections outside RIICO's Industrial Area.

A number of prospective consumers have been requesting Jaipur Discom for extending the industrial feeder and for release of industrial connection from RIICO's 11 KV/LT lines. Such prospective consumers were reported to be existing outside RIICO Industrial Area and in the near vicinity. As per present directions, the line existing in RIICO's Industrial Areas are not extended beyond the limits of industrial Areas.

Looking to the persistent demand from consumers, the matter was examined. After detailed examination, the following procedure is prescribed hereunder for release of connections to industries situated beyond the limits of RIICO's industrial areas.

i) The extension of LT line beyond industrial area should not be made but in case any industrial connection adjacent to industrial area is feasible from the existing line the same can be released by cable service line only limited to 30 meter length.

ii) In case the proposed industrial/ non domestic loads are existing in the rural areas outside limit of RIICO's Industrial area the 11 KV line existing in the industrial Area can be extended up to the limits of 1 KM from the periphery of the RIICO Industrial Area for catering the industrial/non domestic loads. Such connection should be released on 11 kV supply voltage with metering on 11 kV side irrespective of the load of the applicant.

iii) In case the location of the proposed Industrial/ Non-domestic load is situated in the rural area requiring 11 kV extension of more than 1 Km., a separate feeder from the 33/11 KV sub station feeding the industrial area should be laid to cater such loads. Such connection should be released on 11 kV supply voltage with metering on 11 kV side irrespective of the load of the applicant.

Aforesaid instructions shall come into force with immediate effect.

  
(R.P. Goyal)

Dy. Chief Engineer (Comml.)
