ORDER

Sub: Replacement of meters installed at EHV Sub Stations  
at the 33/11 KV feeders emanating from the Grid  
Sub Stations for supply to industrial areas.

During course of discussions in the meeting held on 25<sup>th</sup> Sept'2003 for reviewing the T& D losses in various industrial areas of Jaipur Discom, it was reported that due to non replacement of meters at EHV Grid Sub Stations which are feeding to the industrial areas, the correct information in respect of T & D losses cannot be computed. It was decided that in such cases, the XEn (Mtr.) of the Jaipur Discom should change the defective/stopped meters installed at EHV stations on the outgoing feeders from the available stock of static meters in Jaipur Discom. It was also desired by Hon'ble CMD that this replacement of meters should be completed as early as possible so that correct assessment of T & D losses is made possible at the earliest.
