ORDER

Sub: Accepting the meter boxes from intending consumers under large industrial and MIP categories.

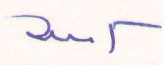

It has been reported that a number of new connections under large industrial and medium industrial category are lying pending due to non availability of proper meter boxes. In normal course, Jaipur Discom provides own meter boxes which are of standard design and specifications for housing the metering equipment of consumers and the cost of the same is recovered from intending consumers in the demand notices. Under the present circumstances, the availability of meter boxes with the Nigam is less as a result of which release of new connections is getting delayed in some area(s). In order to circumvent the problems for the time being, it has been decided that the consumers be allowed to provide their own meter box in case the same conforms to the technical specifications and standard design prescribed by the Jaipur Discom for the meter boxes. The intending consumer can purchase his own meter box as per prescribed specification of the Nigam but the same is required to be approved by the SE (Meters) or his authorised representative before installation at consumer's premises. This arrangement has been prescribed for the time being to avoid hardship to the consumers and after the availability of meter boxes improves the old procedure followed hitherto shall come into force .

my

For the intending consumers who have deposited the cost of meter boxes in the demand notice and have now come forward to provide their own meter box duly approved by SE (meters) or his authorized representative, the cost of meter box should be refunded through adjustment in energy bills, after release of connection to the intending consumer.

These instructions should be followed strictly by all concerned.

my
