ORDER

Sub : Expediting release of industrial connections by maintaining separate priority for connections requiring installation of new distribution transformers and others.

Presently under Small as well as Medium industrial categories, common priority is maintained for the cases requiring installation of new distribution transformer and those cases not requiring such works.

It has been observed that the release of industrial connections gets delayed in many cases due to a connection requiring installation of new Distribution Transformer pending above the priority of individual applications where new distribution transformer is not required to be installed. In order to cut short delay and expedite release of industrial connections, involving no work of installation of new distribution transformer falling below the applications requiring installation of new distribution transformer, the matter was put-up in 67th meeting of the Coordination Committee held on 19-2-04 and it has been decided that in the sub-Divisions separate priority be maintained for industrial connections requiring installation of new distribution transformer and those not requiring installation of new distribution transformers.

It is enjoined upon all field officers to follow these instructions henceforth.

  
(S.C. Malhotra)  
Chief Engineer (C&P)
