ORDER

Sub: Maintenance of separate priority for applications requiring connections on higher voltages under category of Large Industrial consumer.

During the meeting of Executive Engineers of important Industrial Areas held on 25-2-04 it was reported that a common priority is being maintained for all large industrial consumers, in the subdivision offices. The connections, which are required to be released on 33KV or higher voltage, generally take long time in sanction and consequently other connections to be released on 11KV, which are applied after these connections, get delayed unnecessarily.

In order to curtail the element of delay it has been decided that henceforth separate priority be maintained in all subdivisions for large industrial application for release of connection on 11KV and for large industrial applications for release of connection on voltage higher than 11KV.

(S.C. Malhotra)

Chief Engineer (Comml. & Planning)
