ORDER

Sub: Levy of power factor surcharge/incentive, in light of Power Factor Clause of Tariff for Supply of Electricity-2001.

The Coordination Committee in its 68th meeting held on 24-3-04, 31-3-04 and 1-4-04 has discussed the proposals in respect of levy of power factor surcharge/ Incentive and following decisions have been taken for implementing the same: -

The power factor surcharge/incentive shall be levied on energy for increase/decrease of power factor by 1% as per the provision of tariff. For example power factor incentive shall be allowed to a consumer when he maintains power factor of 0.96 and above and not on the Power Factor between 0.95 to 0.96, as per practice being followed. Similarly 1% Power Factor surcharge shall be levied when power factor is 0.89 and not if the power factor value lies between 0.90 to 0.89.

In the same manner power factor incentive @ 2% will be admissible on touching power factor value of 0.97 and not before i.e if the power factor is 0.968.

my
From the above, it is evidently clear that while computing the average power factor value upto two digits after decimal need be taken.

This order will come into force with effect from the billing month of May 2004.

By order,

(S.C.Malhotra)

Dy. Chief Engineer (C&P)
