(OFFICE OF THE CHIEF ENGINEER COMML. & PLAN)**

No. JPD/Dy.CE (C&P)/SE(C)/F.4(210) VI/D.1039

Dt.25.8.04

ORDER

**Sub.:- Use of AB Conductor in place of ACSR "Weasel"
Conductor for electrification of colonies developed
by private builders and other agencies.**

In the meeting of the Coordination Committee held on 19.2.2004 the matter regarding prescribing uniform norms for electrification of colonies developed by private builders and by various agencies like JDA, Housing Board etc. was considered. It was decided interalia that the LT feeders in such colonies be laid on ACSR "Weasel" Conductor.

It was observed and reported that in a number of cases consumers/non consumers in colonies were putting direct PVC wires on naked over head line conductors and indulging in theft of electricity. In order to stop such unscrupulous practices, the matter was discussed in the 66th meeting of the Board of Directors of Jaipur Discom held on 16.8.2004 and it was decided that AB conductor be used in place of ACSR Weasel conductor in erection of LT lines for electrification of new colonies developed by private builders and other agencies.

It is therefore, advised that henceforth all estimates for electrification of colonies be prepared considering AB conductor in place of ACSR "Weasel" conductor for laying LT feeders.
