ORDER

**Sub: Not tapping Railway feeders for
supply to public.**

The Railway Authorities had raised the issue of tapping of the 11 KV/33 KV feeders laid and drawn exclusively for Railways for release of their connections for supply to public. The Raj.Electy. Regulatory Commission had discussed this issue at the time of public hearing in connection with the tariff petitions filed by the Discoms. The Hon'ble Commission had decided that Railway being an essential Service, feeders laid exclusively for them at their cost should not be tapped for supply to public without obtaining their consent. Accordingly, it is hereby advised that whenever any dedicated feeder is exclusively laid for release of connection of Railways at their cost, the same should not be tapped for supply to general public. In case the same is required to be tapped, the consent should invariably be obtained prior to tapping of the feeder.
