DATED: 08.04.05.

O R D E R

Sub: Adjustment and accountal of wheeled energy.

Consequent upon the Wheeling and Banking Agreement executed with the Captive Power Plants/ Wind Power Plants the adjustment of the wheeled energy is being made against the monthly energy bills of the respective consumers. The monthly statement containing the wheeled units, adjustments made and the units banked etc. are being issued by the H.T. Billing Sections to all the Circles under intimation to the Chief Engineer (O&M-I & II) and to the Superintending Engineer (Comml.) RVPN and the Superintending Engineer (RPPC), Jaipur DISCOM among others. However, certain difficulties have been surfaced by a few circles regarding adjustment and accountal of the wheeled energy. In order to allay these difficulties/ misconceptions, it is further to clarify and elaborate that in order to have a proper and adequate accountal, units wheeled and adjusted against the monthly bills of the respective consumers are to be deducted from the respective monthly input of the Circle, as the billing of the wheeled units are not being added by the RVPN in the units sold to Discoms. The Chief Engineer (O&M-II) JVVNL is, therefore, advised to deduct such units from the monthly input of respective Circle while calculating the Circle wise monthly energy drawer.

(R.P. GOYAL)
CHIEF ENGINEER (COMMERCIAL)
