ORDER

Sub: Release of MIP connections with LT metering.

It has been reported that a number of MIP industrial connections are lying pending for want of non availability of 11 KV CT/PT set. Due to non availability of CT/PT sets the metering of such connections on 11 KV supply is not possible and as a result the pendency of these connections is increasing in the sub divisions.

In order to circumvent the problem the matter was discussed in the meeting of Sr. Officers on 20th October'05. wherein it has been decided that the pending MIP connections for want of non availability of 11 KV CT/PT set be released by deploying LT metering for the time being till the availability position eases . Thereafter LT metering be replaced by 11 KV metering by field officers positively.
