ORDER

**Sub: Use of insulated rabbit conductor for drawing  
LT lines in urban areas.**

In order to rule out the possibility of pilferage of electricity by consumers in the urban areas it has been decided that henceforth all LT lines to be laid in the urban areas for release of new connections or otherwise, should be laid by using insulated rabbit conductor. It has been reported that there sufficient quantity of rabbit conductors in the Stores of the Nigam and no difficulty should arise in following the aforesaid instructions.

*hmy* These instructions should be followed strictly by all field officers.
