ORDER

Sub.: Treatment of domestic connections released through agriculture transformers.

To provide uninterrupted power supply to domestic consumer situated in Abadi area of the village, Single phase transformers are being provided, as only one phase supply is available during peak load hours.

Apart from above there are large numbers of household near the wells/ tube wells in the agriculture area/field where it is not feasible to cover all such consumers through single phase transformers. It has also been decided by Nigam that metered transformer shall be installed for providing electric supply to agriculture consumers and the metering arrangements shall be in a welded distribution box so as to exercise check on theft of electricity and reduce T&D losses.

Keeping in view the above circumstances, the matter was discussed in 93rd Coordination Committee meeting held on 20.4.06 & 24.4.06 and it was decided that:-

1. No single phase domestic/ Non-domestic connections should be released through Agriculture metered transformer in future. He will get domestic connection as per provision of TCS-2004 beyond Abadi area.
2. The existing single phase consumers up to 0.5 kW sanction load may be permitted to use electricity in block hours through meters for Agriculture Connection.
3. Such consumers may be permitted to use invertors for use of electricity during peak load hours and their meters provided for domestic connections may be removed after installation of metered transformers.

Strict compliance of above instructions be ensured.
