Dated 07.12.06

ORDER

Sub : Release of load extension and new connections under LT-MIP category.

During the course of the discussions in the meeting of XENs of important industrial areas on 30th of Nov. 06, it was expressed that the pendency of MIP LT connections for new connections and for extension in the load is increasing for want of distribution transformers with welded meter boxes above 40KVA capacity. As a result, the compliance of the order JPR5-356 cannot be ensured.

In this connection it is advised that for such connection three phase 60 A energy meters be installed as a check meter on the LT side of the distribution transformer. All pending LT/MIP connections be released expeditiously likewise.
