Dt: 7.12.06

ORDER

Sub.:- To restrict increase in un-necessary pendency of applications for Industrial Connections & also to expedite release of Domestic & NDS connections in rural areas.

It has been reported that there is increase in number of pending applications for release of new connections, especially under Small Industrial category. In non-abadi area of villages, too many applications for SIP connections are received under the guise of use of industrial connections for agriculture purposes.

The matter of reducing the pendency of industrial connections and also for expeditious release of Domestic and Non-domestic connection was discussed in the "Group meeting of Commercial Wing" held on 25.11.2006 and following decisions have been taken :-

1. Hence forth all the applications for release of SIP connections in non-abadi areas of villages, shall be sanctioned by the circle Supdtg. Engineer. Since common priority is maintained for Abadi & Non-Abadi Area applications of the village, the applications falling low in priority existing in abadi, however, should not be detained for want of sanction of SE for non-abadi cases.
2. For circumventing the problem of 11 KV Voltage Regulation (VR), thereby increasing the pendency of applications, it has been decided that for release of connections on LT supply voltage, the 11 KV Voltage Regulation (VR) of the feeders is not required to be worked out.
3. Single phase LT connections under Domestic and Non-domestic categories in rural areas should be released expeditiously.

By order

(N.M. Sareen)

Chief Engineer (CP & RE)
