ORDER

Sub: Expediting release of pending industrial connections.

In the meeting of Executive Engineers of important industrial areas, held on 21st December'06 the matter regarding increase in the pendency of industrial applicant was discussed.

It was reported that currently delay in release of industrial connections is occurring mainly due to the following reasons:-

- I) Installation of check meters.
- II) Non availability of meter boxes of the Nigam.

In order to expedite the release of pending industrial connections with a view to avoid the loss of revenue to the Nigam, it was decided that the industrial connections should not be kept pending for want of installation of check meters and also on account of non availability of meter boxes. In case the meter boxes are not available the consumer should be asked to provide the meter boxes himself but the meter box should be as per the approved design of the Jaipur Discom. Similarly, in case the check meters are not available the connection should not be kept pending, and the same should be released for the time being so as to reduce the pendency of industrial applicants.

The above relaxation would be available up to 15th January'07.
