ORDER

Sub: Regarding the reading of check meters
alongwith other meters.

Instructions were issued vide order JPR5-367 dt. 7.12.06 to put an extra leaf in meter binders for every building complex for taking the reading of the check meters. Besides, the building complexes, a number of check meters have been installed for industrial consumers. It has also been observed that after installation of check meters, readings of the same are not brought regularly as a result of which the check meter readings are not tallied with the consumption recorded by the main meter of the consumer installed at its premises and therefore the basic purpose of installation of check meters for connections is defeated.

This matter was discussed in the meeting of XEns of important industrial areas held on 27.1.07 wherein it was decided that the readings of the check meters should be taken without fail by the meter readers and for the purpose extra leaf should be provided in the meter binders. The meter readers would be responsible for taking the readings and for noting down the same in the meter binder and ARO would be required to check the same. In case the reading of the main meter is taken by officer other than the meter reader, he would also be responsible for taking the reading of the check meter and for forwarding the same to the sub division.

Above instructions should be strictly complied with by all concerned.

By Order,

N.M. Sareen 15.2.2007

(N.M.Sareen)

Chief Engineer (Comml.)
