No.MD/OSD(Rev.)/F.506 /D. 427

Jaipur, dt. 24-2-14

## O R D E R

It has been noted that stopped/defective meters even of such consumers are not being replaced timely, particularly in respect of whom high tariff is applicable. Such consumers include MIP, NDS, Mixed Load etc. It may be appreciated that such non-replacement causes avoidable inconvenience to the consumers on the one hand and loss of revenue to the Discoms on the other. Moreover, as per directions of RERC, in respect of stopped/defective meters 5 % rebate is to be allowed by the Discoms to such consumers in case their stopped/defective meters are not changed/replaced within two months period. This further entails avoidable extra expenditure on the Discoms.

It is very well known to one and all that the Discoms are reeling under heavy financial stress. It is the need of the hour that strict financial discipline is maintained, revenue growth is augmented and expenditure is minimized optimally to clinch these targeted goals. Therefore, it is also necessary that stopped/defective meters of high tariff consumers are replaced on top most priority but in any case within one week's time positively so as to ensure correct meter reading, billing and thereof proper revenue realization.

To ensure the above, following directions are issued for strict compliance by all concerned:-

1. Preference for replacement may be given to such consumers who are having supply on 11 KV and above, NDS, MIP, Mixed Load including mobile towers and other consumers having sanctioned connected load above 10 KW OR whose monthly average assessment is above Rs 5000/-.
2. ARO of the Sub-division will be responsible for identification of such consumers, including maintenance of record thereof in a separate register.

3. ARO will ensure issue of MCOs of the aforesaid consumers promptly and monitor their compliance. In case compliance is not received within a period of 7 days, he will report such matters to concerned XEN and Circle AO.
4. For easy identification 'High Tariff Consumer' may be marked on the top at right hand side of such MCOs through a rubber seal.
5. Unit Officer of the Sub-division will be responsible for immediate compliance of the above MCOs.
6. MM Wing will ensure availability of meters in the Stores accordingly.
7. The Officers who are responsible for periodic inspection of the Sub-divisions will invariably check compliance of these instructions and will also make a mention of it in their Inspection Report.

  
(A.K. Gupta)

Managing Director
