CIRCULAR

Sub: Regarding testing of removed defective Meter/CT/CT PT Sets.

It has been noticed that removed defective Meter/CT/CT PT sets are not tested in Meter Lab of Jodhpur Discom after its removal. In several cases, M&P wing officers gives a note in JIR that meter/CT/CT PT sets should be tested in Meter Lab but thereafter they did not follow their own noting, due to which correct assessment to the consumer could not be provided and Discom comes on back foot in legal consequences. This also raises consumer grievances.

As such, all concerns are directed to ensure that all removed defective meters/CTs/CT PT sets should invariably be tested in Meter Lab within 10 days of its removal. The responsibility for testing of defective meter/CTs/CT PT Sets shall be of both M&P Wing officers and O&M Wing officers.

By Order,
