

No.JdVVNL/MD/CE(HQ)/SE(RA&C)/JU/2017-18/D. 26 Dt. 06.04.17

ORDER

Sub.: Regarding location of meter/metering equipments.

It has been prescribed at Clause 25(2) of the Terms & Conditions for Supply of Electricity-2004 that, "Metering in each case shall be provided on ground floor only. Metering equipment shall be near the main gate of the premises and easily accessible."

Time and again field officers were directed to shift the meter/metering equipment, which are provided inside the consumer premises, to easily accessible place near the main gate of the premises, if possible service line should also be visible. Even then, it has been noticed that a large number of meters are still provided inside the consumer premises due to which consumers could not be billed with correct reading and in some cases on outstanding physical disconnection could not be possible and Nigam deprives from recovery of correct revenue, beside possibilities of electricity theft cannot be ruled out.

As such, all the field officers are again directed to shift such meter/metering equipment to easily accessible place near the main gate.

By Order,
