Instructions have already been issued in past vide Circular No. RSEB/CE-DCO/C-I/F.4(117)/Pt.VI/D.1922 dated 18-07-98 (Comml.391) regarding proper metering of residential connections in the colonies of Nigam but the employees residing in their own houses were formerly not included under the above provisions. The said matter was discussed in the Senior Officers Meeting held on dated 21-02-2002 and it was decided that at the premises of employees, whether owned by themselves or Nigam, static/electronic meters should be installed. The contents of the instructions issued are reiterated as below in brief:

- 01) The terminal plates of the energy meters installed at residents of the Nigam's employees should be properly sealed.
- 02) The meter box on which the meter is fixed should be properly fixed.
- 03) For the residential areas of the Nigam's colonies as far as possible, supply should be arranged from separate feeder so that it is possible to install meter for the purpose of energy audit.
- 04) It should be ensured that the energy meters do not remain defective/stopped for long periods. In case any meter is found stopped/defective, the same should be promptly replaced.
- 05) The static/electronic meters be installed in all the houses of Nigam's colonies/owned by employees and the work should be completed in a time bound manner.

It shall be liability of the employees to provide their A/C Number and addresses of the connections, so existing, to the concerned billing sub division so that static/electronic meters are installed, if not provided.

It is, therefore, once again enjoined upon all the field officers to ensure that the above instructions are strictly followed for accurate metering of energy utilised. The Zonal Chief Engineers may get compliance from all Circle Superintending Engineers of their area and send final compliance report for his Zone to Commercial Directorate.

By Order,

SE (Comm)
(H. S. DEORA)DY. CHIEF ENGINEER (H/Q)
