ORDER

Sub:- Applicability of Power Factor Surcharge/ Incentive, as per Tariff provision.

The matter regarding different practices being followed for levy of Power Factor Surcharge/ allowing Incentive in respect of H.T. & M.I.P. categories was put up in 68th Coordination Committee Meeting held on 31.3.2004 for adopting uniform method. The Coordination Committee decided that Power Factor Surcharge/ Incentive should be made applicable in accordance with provision of Tariff. As such Power Factor Incentive/ Surcharge shall be applicable on energy charges for every .01 (1%) increase/ decrease of Power Factor i.e. Power Factor Incentive shall be allowed to a consumer when he maintains a Power Factor of 0.96 and above, not on the Power Factor between 0.95 to 0.96, as per present practice being followed. Similarly 1% Surcharge shall be levied when the Power Factor is 0.89 i.e. not for the Power Factor in between 0.90 to 0.89.

It was, therefore, decided that henceforth Power Factor calculation for the purpose of levy of Surcharge/ allowing Incentive shall be worked out in step of .01 only (with no rounding off of the third digit) for all categories of consumers, where Power Factor Surcharge/ Incentive is applicable as per provision of Tariff, 2001.
