ORDER

Sub: Testing/Checking of connections under Small Industrial category having sanctioned connected load from 15 HP to 25 HP and NDS/Mixed load categories having sanctioned connected load from 18.65 KW to 25 KW.

As per provisions of Metering code the routine testing and releasing of new connection / load extension / load reduction for industrial consumers Medium & Large Industrial connections & Mixed Load/NDS connection above 25 KW connected load are being carried out by the XEN's and AEN's of meter wing jointly with the officers of O&M Wing. The NDS/DL/Mixed Load connections less than 25 KW load and also SIP connections are neither released jointly by M&P or O&M wing nor the routine testing is being carried out by M&P wing in prescribed manner. As a consequence, the reports of less billing, defective metering and malpractice remained un-noticed and unattended.

In order to streamline the proper installation of metering system & periodic testing in respect of various consumer category following instructions are issued:-

1. The releasing of new connection/load extension/load reduction of all the connections in NDS/DS/ML category having connected load from 18.65 KW upto 25KW should be carried out by the concerned Assistant Engineer(ST/MST) jointly with the Assistant Engineer(O&M). The metering equipment of such connections including existing connections falling under this category should be checked/tested once in a year by AEN(ST/MST) jointly with AEN/JEN(O&M).

2. The releasing of new connection/load extension/load reduction of all the connections in SIP category having connected load from 15 HP upto 25 HP should be carried out by the concerned Assistant Engineer(ST/MST) jointly with the Assistant Engineer(O&M). The metering equipment of such connections including existing connections falling under this category should be checked/tested once in a year by AEN(ST/MST) jointly with AEN/JEN(O&M).

Aforesaid instructions should be followed strictly by all field officers.

By order
