No.JdVVNL/CE(CPM)/SE(RA-Comml.)/JU/2005-06/D. 1430

Dt. 24/11/05

ORDER

Sub: Regarding installation of sub meters for Iron & Steel Re-Rolling Mills.

The State Government has brought out a composition scheme of Sales Tax for Steel Re-rolling Mills. As per this scheme, the determination of tax amount is directly linked to the electricity consumption. Accordingly, it has been desired by the State Govt. that electric meters are to be installed standardized and sealed for Steel Re-Rolling units.

The above scheme would be applicable to the registered dealers manufacturing re-rolled products of mild steels, i.e. mild steel bars, (CTD/TMT/HSD MS bars), Rods, angles, sections, and strips in the State. Some large industrial consumers are having a single connection for induction furnace and re-rolling mills. In such eventualities the consumption of electricity for the Re-rolling Mills is to be separately metered by installing standardized and sealed meters which would serve as a sub meter to the main meter of the connection for determination of electricity consumption of the Rolling Mills.

For the purpose, standard static meters would be provided by the consumers which are to be got tested and then installed by filed officer as a sub meter to the main connection for measuring the electricity consumption of the Rolling Mills for the purpose of consumption of Sales Tax etc. The main meter of the consumer, however, would record the total consumption i.e. the consumption of the Rolling Mills as well as that of Induction Furnace in case both these operations are done by the consumer from same large industrial connection.

These instructions be followed strictly by field officers.

By order,

(H.S. DEORA)

CHIEF ENGINEER(CPM)
