

**JODHPUR VIDYUT VITARAN NIGAM LIMITED**

No.JdVVNL/C&MD/CE(CPM)/SE(RA&C)/JU/2007-08/D. 78 Dt. 13.2.07

ORDER**Sub : Recovery of transformation losses @ 3% plus transformer rent as per TCS-04.**

It has been provided under the "Tariff for Supply of Electricity-04" that for LT connections, in case the maximum demand as per MDI exceeds 50 KVA more than twice in a financial year, the change over from LT to HT supply is required to be effected. In such cases the consumer shall have to take supply on 11 KV within the notice period of one month to be issued by the AEN concerned after the maximum demand has exceeded third time in a financial year, failing which the connection would be disconnected.

This provision is being made applicable by the field officers and a number of LT/MIP consumers have switched over to 11 KV supply by installing own distribution transformer.

It has been reported that in general consumers who had exceeded the maximum demand more than twice in a financial year had switched over to 11 KV supply by installing own distribution transformer. There are, however, a few cases where the consumers have not switched over to 11 KV supply and even after expiry of one month's period, consumers failed to install own Distribution transformer. In some cases, the consumers have sought extension in the time period for installing the distribution transformer of their own from Corporate office.

In order to resolve this problem uniformly, it has been decided that in case(s) where the extension in the time period for installing own distribution transformer has been allowed by Corporate office and also in cases where the consumer are continuing on LT supply (i.e. consumer opts for Nigam's transformer) even after expiry of one month's notice period despite having exceeded the maximum demand more than twice a financial year, then following charges be also recovered through energy bills every month:

1. The transformation losses @ 3% should be added in the recorded consumption from those consumers whom supply is being given exclusively through a separate distribution transformer and metering on LT side.

2. If the supply is through a common distribution transformer where some more connections have been given, no transformation losses are to be charged.
3. Rent of the transformer be recovered in accordance with Part-II of "Terms and Conditions of Supply" of the Nigam.

The above procedure of billing transformation losses and transformer rent shall, continue till the consumer installs his own distribution transformer.

Above directions shall come into force with immediate effect.

By Order,

 (A.M.LODHA)
