

No.JdVVNL/MD/CE(HQ)/SE(RA&C)/JU/2020-21/D. 2101 Dt. 26/02/2021

ORDER

Sub: Regarding to provide additional metering at the premises of HT supply consumers for power factor purpose.

The new HT connections of higher connected load/demand are generally released through dedicated feeder emanating from 220/132/33 KV GSS and metering in such cases is provided at GSS. Sometimes due to ROW problem full feeder or part of the feeder is laid down by laying underground cable. In case of long length of the cable, power factor goes on leading side due to capacitance effect of the cable in no load condition which leads poor power factor recording in the meter and resulting with power factor surcharge levied on the consumer.

Looking to such problem of consumers, an order Comml.JDP/660 dt.24.07.2014 was issued allowing the additional metering equipment at their premises for the purpose of recording proper power factor, subject to condition that in such cases, the billing will be done on the basis of reading of meter installed at consumer's premises and the difference of kWh reading of two meters (one at GSS and other at consumer's premises) will be charged from the consumer.

The matter was discussed in the 26th meeting of reconstituted Co-ordination Committee, this order is partially modified as under:

“In the cases of consumers having poor power factor and additional metering is provided at consumer's end, the billing will be done on the basis of reading of Main meter installed at 220/132/33 KV GSS and power factor will be taken from the standby meter installed at consumer's premises.”

All concerned are directed to comply with the above directions.

By Order,

(P.J.DHOBI)

**CHIEF ENGINEER (HQ)
JODHPUR DISCOM, JODHPUR**
