ORDER

Sub.: Procedure for releasing connections on 33KV supply voltage.

As per present practice, connections of various category of consumers/electrification of Building complexes, Group Housing Schemes/Colonies are being released/proposed on 33KV supply voltage by tapping the existing 33KV feeder, feeding Discom's Sub-station. This practice is not correct and is also against the provisions of various orders/circulars of the Nigam issued in this regard from time to time.

The matter was discussed in 61st DCF Meeting held on 13-06-2014 wherein it was decided that henceforth 33KV feeder feeding Discom's Sub station shall not be tapped for releasing connection/electrification on 33KV supply voltage except in the cases of Engineering & Medical Colleges.

However, exclusive line erected to feed various consumers, may be tapped or extended to release further connections subject to technical feasibility and in case the connection is not technically feasible from existing line then the same may be proposed to be released from a dedicated feeder emanating from nearest 220KV/132KV Grid sub station or 33KV Sub station.

This is in supersession to all previous orders issued in this regard.

By Order,

(M.L.MEGHWAL)
SUPERINTENDING ENGINEER (RA&C)
JODHPUR DISCOM:JODHPUR

Note: The order is also available on Jodhpur Discom's website www.jdvvn.com.
